

Isowall Group Environmental Policy

I, Debbie van Duyn, Managing Director of Isowall (Pty) Ltd, together with the management team, firmly believe in, and is committed to monitoring and improving environmental performance, pollution prevention and environmental protection. This will be achieved by the implementation and constant maintenance of a management system that complies with ISO 14001:2015, the Environmental Management System sustaining and ensuring that the legal and other requirements concerning the environmental aspects of our products and processes are met.

In so doing, we commit to providing the resources and training required to perform these tasks and to provide awareness to the entire Isowall staff through a team who is trained and well informed in order to prevent pollution, continuously conserve the natural habitats and surroundings as well as to enhance the safety of the environment and the staff of Isowall Group.

Isowall is committed to minimize the environmental impacts that we can control and have an influence over in respect of our manufacturing and installation processes. This aim will be achieved with appropriate and economically viable techniques.

We further commit to review the objectives and targets and analysis of all aspects during our annual management review meetings and use these analysis as a measuring tool for continual improvement and to react timeously incorporating the process of corrective and preventive action.

It is the Isowall Group's policy that sustainable and safe environmental practices be applied consistently and comprehensively to all our activities and at all levels of our organization in order to:

- minimization of pollution, waste, and resource consumption, and commitment to recovery, recycling, and reuse.
- achieve a level of environmental performance which meet or exceed environmental legislation applicable to Isowall Group,
- include environmental considerations in our business plan to ensure that environmental management remains an integral part of our operations,
- implement and maintain a structured environmental management system in line with ISO 14001:2015 and which is based on continual improvement,
- encouragement of EMS practices in suppliers and contractors.
- encourage and equip our employees to identify and act upon opportunities to minimize any adverse environmental impacts and to protect those who report on abuse from any form of victimization,
- communicate the objectives of this Policy to all our employees and interested parties via our Company Newsletter, website and Information for Visitors booklet.

This policy is posted throughout the Isowall facility at 326 and 317 Derdepoort Road, Silverton.

Debbie van Duyn

D.A van Duyn
